HOW THE INVESTMENT WORKS — SIMPLE EXPLANATION

Step 1 — You invest. You provide a minimum of USD 1,000 as business capital. Your money stays in the business and is used to buy cars at auction and run the showroom.

Step 2 — We operate. Our experienced team handles everything: sourcing vehicles at wholesale prices, inspecting, exporting, and selling. You do not need to be involved in day-to-day operations.

Step 3 — Profits are calculated. The business operates monthly and profits vary between 5% and 20%+ depending on market conditions. Slower months are naturally covered by stronger months. At the end of 12 months, total net profit is calculated. The investor always receives profit — there is no loss scenario.

Step 4 — You receive your share. Profit is split between you and Aoki Motors Japan. Two options are available: 50/50 split, or 60% to you and 40% to us.

Step 5 — You stay informed. We send you a financial update every 3 months so you always know how the business is performing.
